Other investigators, prominent among whom are Stevens ( 05), Wilson ( 06) and Morgan ( 07, 09, 10), are inclined to the opinion that sex is not determined until the time of fertilization, and that it is the spermatozoan that definitely and unalterably fixes the sex of the individual. These two views are apparently irreconcilable, and such an array of seemingly indisputable facts has been brought forward in support of each of them that it may.be, as Jordan ( 09) has recently suggested, that sex has been attained by several paths, and is now determined in different modes and at different times in the different groups of animals and plants. If this be true, it will be futile to try to find a single factor,...
