WAY STATION TO SPACE: A HISTORY OF THE JOHN C. STENNIS SPACE CENTER

Createspace, United States, 2013. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****. Way Station to Space is a history of the NASA John C. Stennis Space Center, one of NASA's 10 Field Centers which was built in the enormously exciting days of the Apollo program for a specific purpose-to static fire and certify the huge Saturn V boosters used in the Apollo lunar landing program. With an eye to the future, the facility was planned as a national testing site for large propulsion systems that NASA might use for 25 to 50 years. This book provides the reader with a study of the Apollo era when NASA engineers, technicians, and managers were engaged in that fantastic mission. It captures a sense of the excitement and determination of the NASA team as it prepared for those historic journeys to our nearest planetary neighbor. This book, however, also illustrates the evolution of the south Mississippi facility beyond the Apollo era. The development of the traditions and pride of the NASA Government and contractor teams, formulated during those early years, is likewise portrayed. As is indicated in the text, few of the men and women of that time are still actively working with us, but their tradition of excellence and hard work lives on. As the Apollo program began to ebb, the Nation's focus shifted away from the most ambitious plans for space exploration-to colonize the Moon, construct a Space Station, and mount a human mission to Mars-to less costly endeavors. Under creative management, the Mississippi team began to study the Nation's new priorities with the intention of becoming an integral part of the changing times. The Mississippi Test Facility (MTF-former name of SSC) diversified and brought in other...
