Createspace, United States, 2013. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The Compendium of Infection Control Technologies - Part 1 Every employer where even a single employee is at risk of exposure to blood borne pathogens, such as HIV, HVA, HVB, or HVC, must have a written Exposure Control Plan in place. This plan must include evaluation or consideration of every engineering control, medical device, or personal protective device that is currently on the market for prevention of such an adverse event. Finding and procuring those devices is just the beginning of this gargantuan task. This publication is the central cog in the exposure prevention device evaluation system. The device evaluation task is enormous, as of this writing, there are currently well over 700 such devices on the market. And that is just one of the reasons that so many facilities are severely out of compliance. The task is just too big. At least it was. A task like this was made for computer automation. And that is exactly what has been done here. Simply ascertaining where and what these devices are is a task that could take weeks or months. Then obtaining samples and ascertaining methods of evaluation, months more. This would be a full time job for one or more employees. As the central part of the system, this publication does most of that work for you. The first four books of the Compendium Workbook series introduce you to nearly 300 devices divided into 64 different categories of safety devices plus two categories of educational references. Now, it is so much easier because does all the work to get you the samples. You don t need to call your buying group or suppliers. Just click on the...
