Operation Zitadelle - the code name given by Hitler to the Wehrmacht's last offensive on the Eastern Front in July 1943 - has acquired an almost mythic status as one of the greatest clashes of armour in the history of warfare. For so long depicted as the battle which saw the swan song of the German tank arm due to the huge tank losses experienced by the Germans in the face of massive Soviet defences, the emergence of new information has shown the reality to have been anything but. Indeed, total German write-offs during the offensive were surprisingly low, with those of the Red Army being very high. Zitadelle, although focusing essentially on the German operation, will nonetheless demonstrate how the Red Army had emerged by the summer of 1943 as a new force, and one very different from that ravaged by the Wehrmacht in the terrible summer of two years before. It was enough for one of...
