Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

Berghahn Books, United Kingdom, 2012. Paperback. Book Condition: New. 175 x 107 mm. Language: English . Brand New Book. Technologies of the allied warfare in Iraq and Afghanistan, such as remote-controlled drones and night vision goggles, allow the user to virtualize human targets. This coincides with increased civilian casualties and a perpetuation of the very insecurity these technologies are meant to combat. This concise volume of research and reflections from different regions across Asia, the Middle East, Latin America, and Africa, observes how anthropology operates as a technology of war. It tackles recent theories of humans in society colluding with imperialist claims, including anthropologists who have become involved professionally in warfare through their knowledge of cultures, renamed as human terrain systems. The chapters link varied yet crucial domains of inquiry: from battlefields technologies, military-driven scientific policy, and economic warfare, to martyrdom cosmology shifts, media coverage of distant wars, and the virtualizing techniques and war porn soundtracks of the gaming industry.
