

Boilers and Furnaces Considered in Their Relations to Steam Engineering

Filesize: 5.47 MB

Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

(Rene Olson)

BOILERS AND FURNACES CONSIDERED IN THEIR RELATIONS TO STEAM ENGINEERING

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 114 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 edition. Excerpt: . . . of horizontal tubular boilers from 36 to 72 inches diameter are conveniently arranged for reference in the annexed tables. The strength of shells for corresponding and larger diameters, together with the several kinds of riveting best suited to the strength of plates used, has already been given in Tables XXIX. , XXX. , and XXXI. The number and arrangement of tubes as given in Tables XXXIX. to XLIV. accords with what has been said in this chapter regarding horizontal spacing and the distance of top of upper row of tubes from the bottom of the boilers. Regarding the latter, it may be said that two-thirds is the highest permissible limit; some designers place it at three-fifths instead, in order to get a lower water level. Between these two limits lies the best modern practice. The tube area, total heating surface, and grate area are all expressed in square feet. The ratio of tube area to grate surface is given as 7, 8, and 9, these being the ordinary ratios in practice. The width of grate is in all cases that of the diameter of the boiler; the length is calculated for the fixed ratios of 7, 8, and 9 feet. As these present fractional dimensions, a proposed length of grate-bars for common use is appended. Retarders for Fire-Tubes. --A retarder is a thin strip of sheet iron fitting loosely in and running the whole length of a tube; this iron is twisted one or...
