

A Scrap-Book of Elementary Mathematics; Notes, Recreations, Essays

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Ally Reichel)

A SCRAP-BOOK OF ELEMENTARY MATHEMATICS; NOTES, RECREATIONS, ESSAYS

Theclassics.us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 edition. Excerpt: .B shows the pieces rearranged in a rectangle apparently 7x9, area 63. Parabolic rings A puzzle of a very different sort is made as follows. Take a strip of paper, say half as wide and twice as long as this page; give one end a half turn and paste it to the other end. The ring thus formed is used in theory of functions to illustrate a surface that has only one face: a line can be drawn on the paper from any point of it to any other point of it, whether the two points were on the same side or on opposite sides of the strip from which the ring was made. The ring is to be slit-cut lengthwise all the way around, making the strip of half the present width. State in advance what will result. Try and see. Now predict the effect of a second and a third slitting. The theory of these rings is due to Listing, Topologit part 10. See Ball s Recreations, p. 75-6. DIVISION OF PLANE INTO REGULAR POLYGONS. The theorem seems to have been pleasing to the ancients, as it is to high-school pupils to-day, that a plane surface can be divided into equilateral triangles, squares, or regular hexagons, and that these are the only regular polygons into which the surface is divisible. As a regular hexagon is divided by its radii into six equilateral triangles, the division of the surface into triangles and hexagons...
