Development of Quality Criteria to Evaluate Nontherapeutic Studies of Incidence, Prevalence, or Risk Factors of Chronic Diseases: Pilot Study of New Checklists

By U. S. Department of Health and Human Services

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 82 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. The prevalence and incidence of chronic conditions have implications for policy and healthcare utilization. Valid information about risk factors is important in reducing the burden of chronic diseases. Although systems to rank the strength of the recommendations about effective interventions consider all evidence from observational studies as low, prevalence and risk factors for chronic diseases can be evaluated only in observational studies. Public policy decisions should be based on applicable and unbiased results from high quality studies. Assessing the quality of observational studies is an important part of evidence-based reports made for the Agency for Healthcare Research and Quality (AHRQ). An extensive review of all available systems for rating the strength of scientific evidence and concluded that future efforts need to identify valid and reliable quality ratings for observational studies. Different methodological aspects, including selective treatment assignment, access to health care, or provider characteristics may have different importance for studies that examine treatment effects and prevalence of chronic conditions or the association of disease risk factors with patient mortality and morbidity. Therefore, quality evaluation that is part of grading of a...
